Editorial Comment.

Our telegrams in this evening's issue show that the march to Peking has been most trying and arduous, and it is highly creditable to all concerne that it has been carried out so speedily and successfully. The exact date when the Rollief Force started from Tientsin seems to be somewhat in doubt as the troops did not go off together. But the tight at Peitsang appears to have taken place on the 5th August, and the mini portion of the Force must have left Tientsin about the 3rd of that month. The Allies seem to have-been Goods per Brand undelivered after this aithin striking or shelling distance of Peking on the lath metant, so that the Goods per China undelivered after this much must have been accomplished Cavatina Anna Bolona Donizetti (including the lighting at Peitsaug, Yangtsun and Tung-chow) well within fourteen days. This must be considered exceedingly good work. So he gathered up his robes and departed. But Sir Henry Campbull. Bonnerman had armoged to give Mr. Brodrick a chance of reading out some fresh news from China. Now, the House had ceased to exist for the day, and the question could not be nut or answered. About two hundred members had stopped to hear the news. They crowded round, and shouted 'Read, read.' They also took 100 of the Weihaiwei men. was a grand eight to see them, especially the Bengal Lancers. The Japanese moved out yesterday; for days they have been going. For the last few days they have been feconnoitering about four miles from Tien-Peitsang forts guns. Up to yesterday they had not been able to do so, though a few Japanese wounded have been brought in There is firing going on now. We don't know whether those forts will have to be taken before they go to Peking. The Boxers are ready to leave; They have left mon to return to Tientain as soon as our troops to hold the place, though. To-day ten eleven nurses came from Manila': think some of them have gone to Peking. At least I saw two in a large

American waggon going towards Peking I suppose I was ordered away the same as others, but Dr Bean and I preferred remain here and look after the refugees in our native churches. My hospitul is wrecked, but I have taken three wounded Chinamen into Dr. Smith's hospital. Dr Bean and I treat them. This week we imputated a man's arm who had been wounded at the taking of the Taku forts, As soon as he came out from the chloroform he insisted on getting up and knocking his head to us. The Boxers Begin. On Saturday 4th, at 7.15 a.m., over 150 Boxurs made their long-promised attack on the foreign settlement. They were armed with swords, knives and spears. An at tempt was made by them to cross the barrier constructed near the river-side Several members of the volunteer corps wore at once on the spot and attempted to ing night march. The whole force suffered drive them off by firing several blank shots. This, however, had not the desired effect, and as reinforcements had arrived fire was opened in earnest and resulted in 10 killed and as many wounded; the rest beat a hasty retreat. Some 20 Russian marines had by this strived who, assisted by the retreating mob. Tholesder of the Boxers was pluckily captured by a volunteer and was afterwards shot by a squad of Cossacks and volunteers. He was most profusely covered with red ribbons and his flowing

C. 262, one of the witnesses for the prosecution, to defendant the sum of \$5 which he had won and also to have received 25 cents as bis percentage or communition, which he charged on the amount won by the second defendant. THE PROPOSED REPUSE-DESTRUCTOR.

A meeting of the Sanitary Board was hold yestorday afternoon, when the following discussion took place with regard to the necessary for me to refer to the case rather refuse destructor, which it was agreed to

get in June of last year. their recommendation to the Council. Then it came before the whole Council, and it might or might not be approved. Nothing of that sort had ever gone through, As a matter of fact in the list which he sent to the Severnment for next year the sum of \$60,000 appeared for a refuse destructor, but it had not yet been approved by the poned for further consideration in order that they might have information as to the working of these refuse destructors. This \$60,000 - which it was pro-

elsewhere across the harhour; so that it seemed necessary before the Council voted the money for a refuse destructor that they should consider the matter very carefully. Dr Clark said the word experiment might to some extent be misleading. There was no question of experiment as to the efficacy or otherwise of a rofuse destructor. It had been settled, long ago. The only point which required experiment was how much refuse each individual destructor could deal with. The nature of the refuse of every city varied. In some there was a considerable amount of cinders, which assisted greatly in the burning of the refuse. In a city such as this there would probably be a lot of dry regatable matter, except in the wet season, and what it was necessary to discover was how many cells would be required to bern the refuse of the city. The proposal was to

provide six cells to begin with.
